Patent Pending

ATC // AVX Thin Film Technologies is pleased to introduce the 504L Series next generation of surface mount Ultra-Broadband Resistors. This product was designed with our proprietary Glass Sandwich Flexiterm® Technology, (GSFT). The Flexiterm® is a surface mountable automotive qualified termination that adds an extra margin against damage due to flexure during installation.

The 504L Series has been designed with high quality selected materials that yield excellent performance. It can be supplied as either frequency compensated or non-compensated. This product is ideal for use in Optical Transceiver Modules or any application requiring excellent ultra-broadband performance.

### Applications:

- Optical Transceiver Modules
- Broadband Receiver
- TOSA / ROSA
- Wideband Test Equipment
- Low Noise Amplifier
- MMIC Amplifiers
- Mixers
- Directional Couplers
- Ultra-Broadband Splitters and Combiners

### Markets:

- Opto-electronics
- Automotive
- Telecom
- Broadband Jamming for EW
- Satellite Communication
